

ICE CLASS TANKERS

a TANKEROperator report

Researched and written by Patrik Wheeler

This definitive in-depth report, produced by *TANKEROperator* Magazine, addresses the many issues surrounding the trading of oil tankers and gas carriers in environments not normally suited to normal oil tanker or gas carrier operations.

Researched and written by a technical journalist with seagoing experience, this report is a must for all those involved in

owning, managing and operating tankers and gas carriers in extreme conditions, such as those found in the Gulf of Finland and northern Russia in winter.

Ice Class Tanker Report covers many areas, such as future challenges of trading in ice conditions, potential damage when sailing in ice, class society notations, propulsion and coatings issues, innovative ship designs, seafarer skill shortages and the future for Arctic LNG carriers and others.

Ice Class Tanker Report is available both electronically and in hardcopy for £295.00
